GO price benchmarks

Published: 16.10.2023

Notes and methodology

For this report, price benchmarks are calculated for three different technologies, and they represent a pan-European indication. The sole purpose of this data circulation is to support the participation of HUPX GO Members on HUPX GO Auctions. HUPX is not liable for any use or misuse of the listed prices in line with HUPX GO Rules and Regulations.

Data description

Data is prepared in cooperation with [Veyt AS](#). Closing prices are calculated at the end of each day and represent the last recorded transaction of Veyt data partners before the end of business. In case of insufficient transaction data due to low activity in the market, the closing price is the average of the bid and ask price quotations that Veyt receives from data partners, such as traders and brokers.

About Veyt

Rooted in decades of experience and with a global team of experts, Veyt provides objective and forward-looking analysis for all significant low-carbon markets and helps its clients navigate the green certificate and carbon markets. As an independent market intelligence provider, Veyt strives to create a world where individuals and organizations are equipped with the knowledge and tools, they need to make sustainable decisions and create a better future for all. Veyt's platform combines strong expertise in the power, biomethane and carbon markets, offering price data, predictive analytics, market developments, and policy insights to subscribers.
